

VF-G1000

CUTOUT mm (inches)

Measures for panel mounting.
Maximum panel thickness = 10mm (0,393 inches).

There are two ways for mounting PFD/MFD panel in the cockpit:

- 4 screws from the front of the cockpit (recommended).
- 4 supports from the back of the cockpit.

The Audio panel mounting is always from the back, with 2 supports.

You can find the CUT-OUT measures in DXF format in our DOWNLOADS G1000 section:
